	NSG 552	Advanced Concepts in Care of Women	4	150
Fall	NSG 514	Inquiry 2	3	
	NSG 553	Advanced Concepts in Care of Children	4	150
Spring	NSG 551	Advanced Concepts in Care of Adults	4	150
	NSG 515	Capstone	3	
		Total Credits and Clinical Hours	46	600

Family Nurse Practitioner Post-Graduate Certificate Program

The purpose of the post-master's study program is to provide, for nurses who already hold a master's degree in nursing, an educational route to specialization in an area other than that obtained in their master's program. The program is designed to strengthen or broaden the clinical and rural nursing aspects of master's-prepared nurses who are planning a role expansion or role change.

All students are eligible for the program following their application to the program and following a Gap Analysis (NTF Criteria, 2016) of transcripts, courses, clinical hours and grades. After advising sessions are provided to each student, students may be eligible for course waivers at the discretion of the Program Director. Upon completion of this variable-credit program, the nurse will be eligible for professional FNP certification.
