

What is the dual credit program?

Mount Marty University dual credit program provides a unique opportunity for students to enroll in courses that earn both high school graduation and college credit simultaneously. MMU's first partnerships in the Dual Credit Program were formed in 1996 and have proven to be very successful and an educational asset to students who take advantage of the program.

What are the benefits?

Through participation in the dual credit program, students gain confidence in themselves and their ability to do college level work. This allows high school juniors and seniors to get a "jump start" on their college education. By receiving college credit for these courses students do not have to repeat basic level freshman courses in college. This may allow students to graduate in four years, take lighter credit loads, or double major.

What are the costs?

\$60 per credit hour
Refer to [Parent/Student Guide](#) for financial information

Who is eligible to register?

Students must obtain approval from their high school's guidance counselor, teacher, or appropriate personnel to register for a dual credit course. Students must be approved for advanced placement courses or meet two of the following criteria:

- cumulative grade point average of 3.0
- minimum grade of "B" in prior content related courses of the dual credit course
- minimum ACT score of 21 in content related sub test
- rank in the top half of the class

What is the process for registration?

Students will register online: www.mountmarty.edu/academics/dual-credit/. If you would like to receive college credit for both semesters you must register separately for both the fall and spring classes during the dates listed below (unless otherwise indicated). Students must contact the registrar's office in order to drop or withdraw a course and must abide by the deadlines to drop as outlined in the academic calendar.

Fall 2022 (Last day to withdraw 11/9/22)

Spring 2023 (Last day to withdraw 3/24/23)

CHM-111 General Chemistry I (4 credits)

CHM-112* General Chemistry II (4 credits)

* requires registration and successful completion of first semester pre-requisite course
